What is TeLSI 2017 all about?

Here are a couple of ideas...

The "Institute" is an intensive four-day interactive experience(s) based on design-based/creative learning strategies.

This approach taps participants' natural creativity to develop higher-level thinking and enhance or strengthen comprehension of the K-12 curricula. It is never restricted by the changing world of content standards. This year's "Institute" is focused on the content areas such as English, Science and Math.

Expected participants are high school grade level teacher-leaders with specializations in the subject areas earlier mentioned. After the training, they are expected to use the different teaching approaches or pedagogies tackled during the institute by applying in their current teaching practices or by using those strategies, such as differentiated instruction, cooperative learning, integration of 21st century skills in instruction and many others in order to make a dramatic difference in their respective classrooms.

Objectives:

At the end of the program, the participants will be:

- inspired and empowered to transform learning and teaching through evidence-based inter-active practice;
- able to learn practical strategies for enhancing student learning;
- able to explore scientific/researched-based teaching principles of active learning, assessments, and inclusive teaching;
- able to participate activities that include **reflective writing**, planning, reading, researching, discussing teaching methods and philosophy, interactive presentations, and developing teaching materials; and
- able to develop a **sense of responsibility to value and enhance the learning** of every pupil/student.

By the end of the institute, participants will have observed, evaluated, and collected a portfolio of innovative teaching approaches and instructional materials that are ready to be adopted and adapted to their own teaching environments or classrooms.

"It is a call for new direction of DepEd Cebu Province to emphasize academic rigor and active engagement among teachers and learners in every classroom"
